

Laundry

Cleaning checklist

- ✓ Dry your clothes outside (except for on high pollen count days, after thunderstorms and on windy days)
- ✓ Avoid hanging your clothes to dry inside your house – this can contribute to moisture in the air
- ✓ Did you know? Hot tumble drying of washed items for 10 minutes after they are dry will kill dust mites
- ✓ Clean rubber seals on your laundry appliances

Product and service checklist

- ✓ Use laundry powder or laundry liquid with fewer harsh chemicals and no fragrances
- ✓ Consider washing machines with no rubber seals to reduce the mould build up in your machine
